Government of India
Ministry of Agriculture & Farmers Welfare
Department of Agriculture & Farmers Welfare

PREFACE

The Land Use Statistics at a Glance is an annual publication being published by this Department contains data on All India and State-wise Land Use Classification, Gross & Net Irrigated Area (source-wise), Irrigated area under all crops during the reference period. The Land Use Classification followed is a nine-fold classification as recommended by a Technical Committee on Coordination of Agriculture Statistics set up in 1948 by the then M/o Food and Agriculture. This classification is primarily based on whether a particular area is cultivated, grazed or forested. The purpose is to show existing land distribution of crops according to its actual use. Once the actual land use pattern is known, it is possible to explore the alternatives for an effective sustainable land use, protect agriculture land from depletion and assist the Government in framing land use policy towards better conservation while pursuing sustainable development goals.

This publication has been prepared by Agriculture Census Unit-II of Economics, Statistics and Evaluation Division of this Department based on the input data supplied by the State Agricultural Statistics Authorities (SASAs) in all States/ UTs and other concerned agencies. The publication is available at <https://desagri.gov.in>. Comments and feedback, if any, for improvement of contents / quality, presentation may be sent to sdds.des-agri@nic.in. I hope this report would be found useful to all the data users and organisations associated with the development of agriculture in the country.

(Rajendra C. Gautam)

September, 2024

The following Officers and Officials are associated with this publication:

Officer/ Official	Designation
Smt. Honey C. H.	Adviser
Dr. P. Babu	Assistant Economic Adviser
Shri Brijesh Prasad	Economic Officer
Shri Rajesh Kumar Kushwaha	Junior Statistical Officer
Shri Rohit Kumar	Technical Assistant
Shri Amin Kumar	Data Entry Operator Gr. B
Shri Aakash Kumar	Technical Clerk
Shri Rahul Khushwah	Data Entry Operator Gr. A
Shri Azad Singh	MTS

Area Under Crops (2013-14 to 2022-23)		
3.1	State-wise Area Under Crops	66-128

Overview of Land Use Statistics at a Glance -2022-23

1. INTRODUCTION

Land use statistics refers to the statistics of land and its use pattern, it is one of the important data indicator for signaling/understanding the land utilization pattern for planning and policy formulation. The statistics of land primarily reveals how land is utilized or allocated for various purposes in the State/country, it provides insights into different types and patterns of land uses such as area under Agriculture and Non-Agriculture, area under crop, area Irrigation and non-irrigation, cultivated & non cultivated area, forest area, barren land, fallow land etc. purposes. The statistics of Land use are important for studying the changes in land use pattern, cropping pattern, Impact of development programmes as well as efficient and sustainable utilisation most valuable natural resource. Moreover, Land use statistics is important for decision making about resource allocation, Food security, land reforms and regulations, environmental management, infrastructure development etc. and thus becomes essential for planning, management, policy formulation and to provide cutting edge evidence based policy advise.

Keeping in view of the importance of the land use statistics, the then Ministry of Food and Agriculture has set up a Technical Committee on Coordination of Agriculture Statistics in 1948 and as per the recommendation of the committee, Nine-Fold Classification of land use statistics such as (1) Forests, (2) Area under Non-Agricultural use, (3) Barren and Uncultured Land, (4) Permanent Pastures and other Grazing Land, (5) Miscellaneous Tree Crops, (6) Culturable Waste Land, (7) Fallow Land other than Current Fallows, (8) Current Fallows, and (9) Net Area Sown are collected, compiled and published as “Land Use Statistics at a Glance” annually from agriculture year 1950-51.

2. METHODOLOGY

For Land-Use Statistics Publication, Nine Fold Classification is followed, based on the recommendation of a Technical Committee on Coordination of Agriculture Statistics set up in 1948.

A. Classification adopted for Land-Use Statistics: Concepts & Definitions

- (i) **Forest Area:** This includes all land classified either as forest under any legal enactment, or administered as forest, whether State-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests remain included under the “forest area”.
- (ii) **Area under Non-agricultural Uses:** This includes all land occupied by buildings, roads and railways or under water, e.g. rivers and canals, and other land put to uses other than agriculture.
- (iii) **Barren and Un-culturable Land:** This includes all land covered by mountains, deserts, etc. Land, which cannot be brought under cultivation except at an exorbitant cost is classified as unculturable whether such land is in isolated blocks or within cultivated holdings.

- (iv) **Permanent Pasture and other Grazing Land:** This includes all grazing land whether it is permanent pasture/meadows or not. Village common grazing land is included under this category.
- (v) **Land under Miscellaneous Tree Crops, etc.:** This includes all cultivable land, which is not included in 'Net area sown' but is put to some agricultural use. Land under casuarina trees, thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under 'Orchards' are classified under this category.
- (vi) **Culturable Waste Land:** This includes land available for cultivation, whether taken up or not taken up for cultivation once, but not cultivated during the last five years or more in succession including the current year for some reason or the other. Such land may be either fallow or covered with shrubs and jungles, which are not put to any use. They may be accessible or inaccessible and may lie in isolated blocks or within cultivated holdings.
- (vii) **Fallow Lands other than Current Fallows:** This includes all land, which was taken up for cultivation but is temporarily out of cultivation for a period of not less than one year and not more than five years.
- (viii) **Current Fallows:** This represents cropped area, which is kept fallow during the current year.
- (ix) **Net Area Sown:** This represents the total area sown with crops and orchards. Area sown more than once in the same year is counted only once.

B. Definitions of some Commonly Used Terms:

- (i) **Geographical Area:** The latest figures of geographical area of the State/Union Territories are as provided by the Office of the Surveyor General of India.
- (ii) **Reporting Area for Land Utilisation Statistics:** The Reporting area stands for the area for which data on land use classification is available. In areas where land utilization figures are based on land records, reporting area is the area according to village papers, i.e. the papers prepared by the village accountants. In some cases, the village papers may not be maintained in respect of the entire area of the State. For example, village papers are not prepared for the forest areas but the magnitude of such area is known. Also there are tracts in many States for which no village paper exists. In such cases, estimates of classification of area from agriculture census are adopted to complete the coverage.
- (iii) **Gross Cropped Area:** This represents the total area sown once and/or more than once in a particular year, i.e. the area is counted as many times as there are sowings in a year. This total area is also known as total cropped area or total area sown.
- (iv) **Area Sown more than once:** This represents the areas on which crops are cultivated more than once during the agricultural year. This is obtained by deducting Net Area Sown from Gross Cropped Area.

(v) Irrigated Area: The area is assumed to be irrigated for cultivation through such sources as canals (Govt. & Private), tanks, tube-wells, other wells and other sources. It is divided into two categories:

(a) Net Irrigated Area: It is the area irrigated through any source once in a year for a particular crop.

(b) Total / Gross Irrigated Area: It is the total area under crops, irrigated once and/or more than once in a year. It is counted as many times as the number of times the areas are cropped and irrigated in a year.

(vi) Total Net Un-Irrigated Area: It is the area arrived at by deducting the net irrigated area from net sown area.

(vii) Total/Gross Un-Irrigated Area: It is the area arrived at by deducting the gross irrigated area from the gross sown area.

(viii) Cropping Intensity: It is the ratio of Total Cropped Area to Net Area Sown.

(ix) Agricultural Land/Total Culturable Land /Total Cultivable Area/Total Arable land:

This consists of net area sown, current fallows, fallow lands other than current fallows, culturable waste land and land under miscellaneous tree crops.

(x) Total Un-Cultivable Area/Land: It is the area arrived at by deducting the total cultivable area from the total reported area.

(xi) Total Cultivated Area/Land: This consists of net area sown and current fallows.

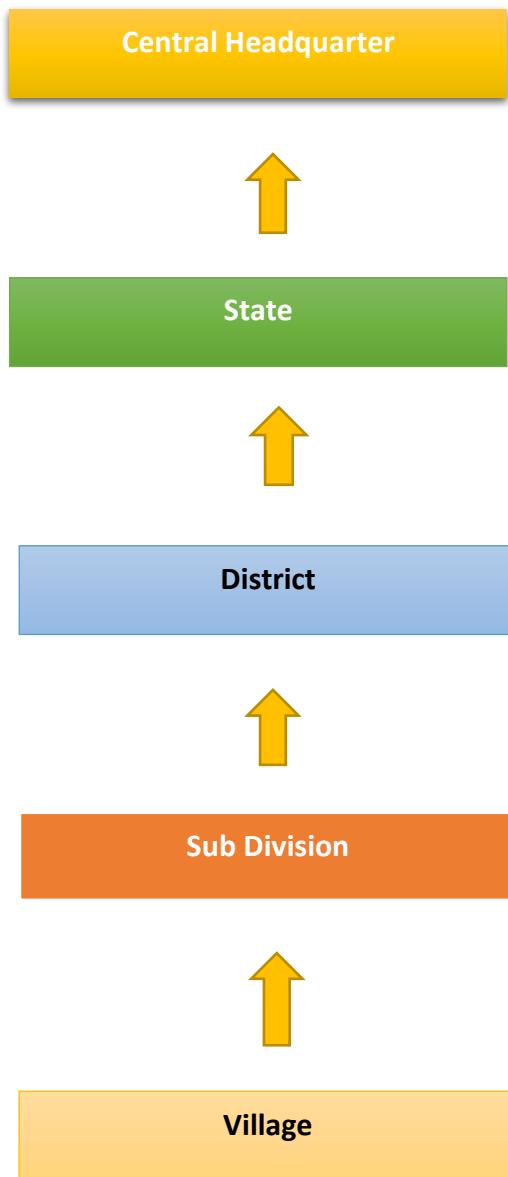

C. Data Collection Method

Data Source: The required data for Land Use Statistics at a Glance is collected from all the Indian States and Union Territories on annual basis (Agriculture year i.e July to June).

The State Agricultural Statistics Authorities (SASA)/ State Directorate of Economics & Statistics (DESs) of all the States and UTs Department/Office furnishes the data: Majority of States Directorate of Economics & Statistics office submit the data. Some of the States/UTs, the Directorate of Agriculture, Department of Agriculture and Land Record Office submit the data.

Official of revenue, irrigation and agriculture, etc. at Block level collect data on LUS and reconcile the same at Sub-division and District levels and finalize the LUS of a particular district at District level. Finalized LUS is sent to SASA (State HQ.) and after validation of the report at State HQ the report is sent to Central Headquarter.

The flow chart of the data from sources:

Note: If the data is not-reported by any States/UTs for any reason,

- (i) the Data from other Divisions of MoA&FW is considered for compilation
 - Area under crops is collected from Agriculture Statistics Division of MoA&FW.
 - Area under horticulture crops from Horticulture Division of MoA&FW.
 - Area under irrigation from various from Agriculture Census Report.
- (ii) Estimation of data (only in case of area under irrigation).
- (iii) Repetition of previous year's data.

Considering its importance and its utilization in finding the current scenario of land pattern, it was essential to reduce time lag in publication, therefore, this Department has developed new software for data capturing and reports generation which also provides multi-faceted facilities based on the latest technology. The application has provisions for data entries and report generation facilities at district, state and center level. Before onward submission of data, the following checkpoints for validation must be taken into the account:

- Source-wise Net Irrigated Area is less than or equal to the Source-wise Gross Irrigated Area. (both district-wise and for the State).
- Source-wise Gross Irrigated Area is equal to Crop-wise Gross Irrigated Area (both district-wise and for the State).
- Crop-wise Gross Irrigated Area is less than or equal to Area under the crop. (both district-wise and for the State, invalid data highlighted with red color).

D. Explanatory Notes:

For the current Land Use Statistics at a Glance: 2013-14 to 2022-23:

Wherever data have not been received in this year from the State/UT Governments for different parameters, following estimation procedure has been used:

***Classification of land (Part-I):** The figures related to area under forest are taken from latest “State of Forest Report,” of the Forest Survey of India, Dehradun. The other categories of land use (Part-I), net irrigated area, gross irrigated area, net area sown and area under crops as the case may be, are taken from latest Agriculture Census or are estimated based on latest available year data received from the States/UTs respectively.

****Irrigated Area (Part-II):** The figures related to irrigated area (Part-II) are either estimated based on the data for the latest available year received from the States/UTs or are estimated/taken from Agriculture Census.

*****Area Under Crops (Part-III):** The figures related to Total Cropped Area (Part-III) are either estimated based on the latest available data received from States/UTs or are based on advance/forecast estimates received from the States/UTs.

- Note:** (1) There can be variations in the geographical area and reported area in some states due to usage of different data sources. While reported area is based on the information provided by the States. Geographical area is based on the data supplied by the Office of Director, Geographical Map Publication, Survey of India, Dehradun and includes the area under illegal occupation by China and Pakistan. However, for the year 2019-20, Geographical area is based on the Provisional data supplied by Forest Survey of India, Dehradun.
- (2) The figures classified under different columns for different categories of land, viz, land put to different uses according to nine-fold classification, area under irrigation and area under crops do not always add up in sub-totals and as a whole to the area totals at state and all India levels due to rounding off of the figures.

- (3) '0' means area is less than 500 hectares.
- (4) Blank space denotes not available or no reporting of data from the States/UTs
- (5) NAS: Not Available Separately.
- (6) (p): Provisional.

E. Data Dissemination System

- LUS Publication compiled and published annually by AC Unit, ES&E, DA&FW
- Periodicity: Annual
- State-wise data on nine-fold classification available since 1950-51
- District-wise data on nine-fold classification available since 1998-99
- Latest Available: 2022-23
- Publication contains all India and State-wise data on:
 - Land Use for various purposes (as per nine old classification)
 - Source-wise & Crop-wise Irrigated Area
 - Area under crops
- Web based dissemination: Link/URL: <https://desagri.gov.in> Latest Available: 2022-23
- Publication is available to download in PDF and MS Excel
- Customized report/ data can also be downloaded from website

F. MAJOR FINDINGS OF LAND USE STATISTICS AT A GLANCE: 2022-23

Table A: Part I: Land Use Pattern as per Nine-Fold Classification All India

Classification of land		(thousand Hectares)
	Reporting area for land utilization statistics (1 to 9)	306650
1	Forests	72021
2	Area put to non-agricultural uses	27845
3	Barren & unculturable land	16554
4	Permanent pastures & other grazing lands	10248
5	Land under Misc. tree Crops	2992
6	Culturable Wasteland	11659
7	Fallow Land Other than Current Fallows	11128
8	Current Fallow	13498
9	Net Area Sown	140705
	Agricultural Land (5+6+7+8+9)	179982
	Cultivated Land (8+9)	154203
	Cropping Intensity (% of Total cropped Area over Net Area Sown)	155.9

- During the year 2022-23, the total reported area by all States/UTs is 306650 thousand hectares which is about 93.28 per cent against the total geographical area of 328755 thousand hectares.
- Under Nine Fold Classification of Land the year 2022-23, it can be observed that, more than 58 percent of land area is available for Agriculture purposes in the country. Similarly, the states Haryana and Punjab tops with highest land available for agriculture purposes with 90.74 and 83.98 percent respectively, while the lowest land available for Agriculture purposes in the union territory of Andaman & Nicobar Islands and in the state Arunachal Pradesh with 3.89 and 6.02 percent respectively. The State wise percentage share of Land available for Agricultural and Non-Agricultural Purposes as well as Nine Fold Classification of Land during the period 2022-23 is given in Graph-No. 1.
- Area of agriculture land during 1950-51 was 66.70% of Reporting Area, which is reduced to 58.69% (Ref. Graph: 2). This decrease in Agriculture Land may be attributed to growing demand for increasing population, urbanization, industrialization.
- Despite this decreasing trend of agriculture land, surplus production of foodgrains is being recorded which can be attributed to growing crop intensity rate.
- Cropping intensity during 2022-23 has reported 155.9 % and the same was 111.1 % during 1950-51 (Ref. Graph 6).
- 85.68 percent of area is being cultivated from the total available Agricultural/cultivable Land during 2022-23. The union territory Lakshadweep and States Punjab, West Bengal, Manipur have utilized more than 98 percent of the available agriculture land for cultivation purposes. The State wise percentage share of area cultivated from the total available Agricultural/cultivable Land during 2022-23 can be seen from the Graph-No. 3
- Area Cultivated land to the total Agriculture land in 1950-51 was 68.25 which is increased to 85.68% in 2022-23 which can be seen from Graph 4.
- The net area sown has decreased by 0.21 % and area under agricultural land has decreased marginally by 0.07% in 2022-23 over the previous year (Ref. Graph 5).
- Area under Cultivated land has decreased from 154262 thousand hectare in 2021-22 to 154203 thousand hectares in 2022-23 (decrease of 0.04%)
- Area under Barren land and Forest during 1950-51 was 13.42 % and 14.24 % respectively. The Barren land reduced to 5.4 % and area under forest increased to 23.49% (Ref. Table A).

Table B: Part II: Source-Wise Irrigated Area All India

Irrigated Area (in thousand Hectares)		
1	Government Canals	17959
2	Private Canals	165
3	Total Canals (1+2)	18124
4	Tanks	2235
5	Tube-wells	39134
6	Other wells	10672
7	Other Sources	9147
Net Irrigated Area (3+4+5+6+7)		79312
Gross Irrigated Area		122294
% of Gross Irrigated Area over Gross Cropped Area		55.8
% of Net Irrigated Area over Net Area Sown		56.4

- This part of the publications deals with area under irrigation. The State-wise irrigation data under following categories:
 - Source-wise: Canals (Govt. & Private), Wells (Tube wells & other wells), Tanks, Other sources (streams, ponds etc)
 - Crop-wise: Food Grains, Sugarcane, Condiments Fruits & Vegetables and Oil Seeds, Fibers Plantation & Other Non-Food Crops
- All India level aggregated data available since 1950-51
- State-wise data available in since 1984-85
- Share of irrigated area and area irrigated more than once from gross irrigated area during 2022-23 is 64.85% and 35.15% respectively. The union territory Chandigarh and Andman & Nicobar Island contain 100% irrigated area. Jharkhand has maximum percentage share of net irrigated area and area irrigated more than once from gross irrigated area during 2022-23 can be seen from the Graph-No. 7
- Percentage share of net irrigated area & area irrigated more than once to the gross irrigated area during 1950-51 was 92.42% and 7.58% respectively, which is increased to 64.85% and 35.15% in 2022-23 can be seen from Graph-No. 8
- Share of net irrigated area to net sown area is maximum for Punjab and minimum for union territory; Andman & Nicobar Islands in 2022-23. The entire area sown in Delhi and Ladakh is irrigated (Ref. Graph 9)
- Share of net irrigated area to net sown area during 1950-51 was 17.56%, which is increased to 56.37% in 2022-23 (Ref. Graph-No 10).
- Whole irrigated area of the State of Meghalaya and Mizoram is irrigated by canal and followed by Ladakh with 90.79%. Lowest area irrigated by canal is observed in Jharkhand with 1.92 (Ref. Graph 11)
- Area irrigated by tube-well during 1960-61 was 0.55% of total irrigated area, which has been drastically increased up to 49.34%, it would speedily reduce the ground water (Ref Graph 12).
- Percentage share of area irrigated by Canals to Net Irrigated Area during 1950-51 was 39.78 % which has come down to 22.85 %, on other the hand percentage share of irrigated by Tube

wells during 1950-51 was nil which has shoot up to 49.34% (Ref Graph 12).

- This trend of using tube wells for irrigation is major cause for underground water depletion.
- The Net Irrigated Area and Gross Irrigated Area for the year 2022-23 is 79312 thousand hectares and 122294 thousand hectares, respectively (increase of 1.79% and 1.59%, respectively, over 2021-22).
- Percentage of Gross Irrigated Area over Gross Cropped Area is 54.90 % and 55.80 % respectively, in 2021-22 and 2022-23.
- Percentage of Net Irrigated Area over Net Area Sown has increased from 55.26 % in 2021-22 to 56.37% in 2022-23.
- Area irrigated by Canal during 1950-51 was 39.78% of total irrigated area, which is reduced up to 22.85% in 2022-23.
- Area irrigated by Tube-Well during 1960-51 was 0.55% of total irrigated area, which is drastically increased up to 49.34%, it would be speedily reduced the ground water.
- Area irrigated by Wells during 1950-51 was 28.67%, which is reduced up to 13.46% because Farmers area dependent on modern irrigation e.g. Tube-well, sprinkling, drip method.
- Net irrigated area during 1950-51 was 92.42%, which is increased up to 64.85% in 2022-23.

Table C: Part III: Area Under Crops

Area under crops (in thousand Hectares)	
Total Foodgrains	136309
Total Cereals & Millets	180781
Rice	49527
Wheat	34994
Total Pulses	27528
Total Condiments and Spices	4598
Total Fruits & Vegetables	12024
Total Food Crops	160244
Total Oilseeds	33181
Sugarcane	6794
Cotton	13009
Total non-food crops	59113
Total Cropped Area	219357

This part of the publications deals with area under different crops. Area under crops is compiled crop-wise under following three broad categories

- (i) **Food Grains:** include - Rice, Jowar, Bajra, Maize, Ragi/ Marua, Wheat, Barley, Gram, Tur, Other Cereals & Millets and Pulses
- (ii) **Sugarcane, Condiments & Spices, Fruits & Vegetables and Oil Seeds:** include - Sugarcane, Condiments & Spices, Total Fruits & Vegetables, Other Food Crops, Groundnut, Castorseeds, Sesamum, Rape-seed & Mustard, Linseed, Coconut and other oil seeds.

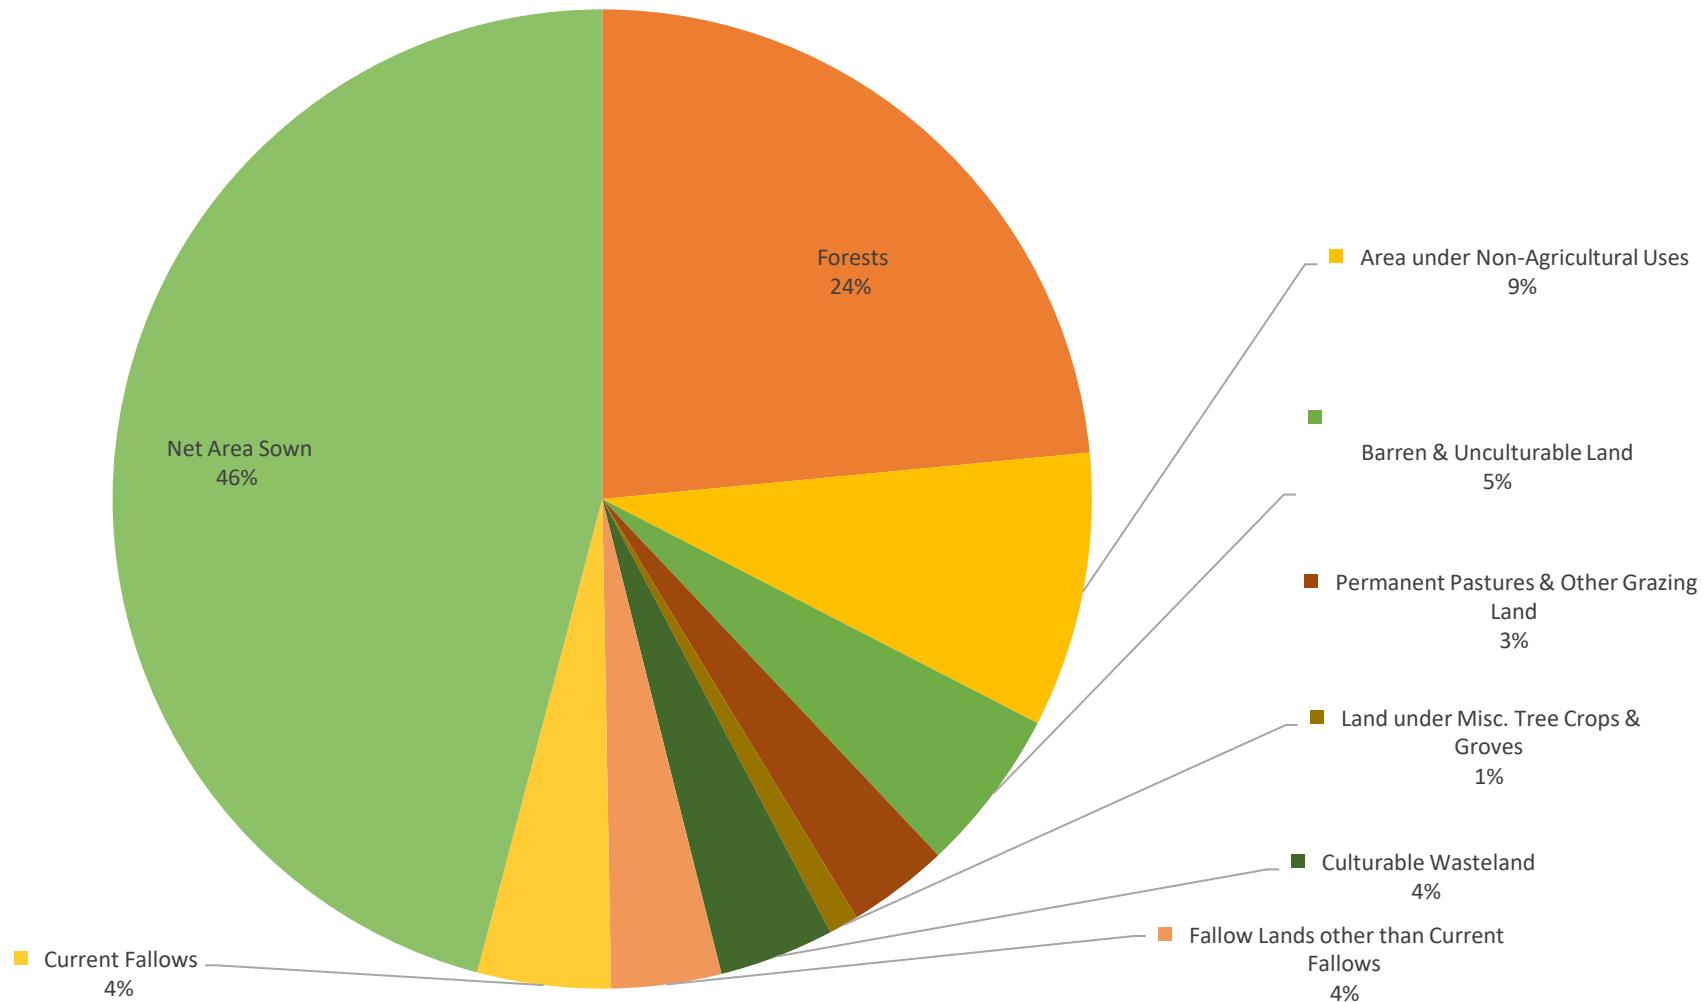

(iii) Fibers Plantation & Other Non-Food Crops: includes - Cotton, Jute, Other Fibers, Indigo, Opium, Tobacco, Tea, Coffee, Fodder Crops and Non-food crops, Drugs Narcotics & Plantation Crops

- In compare to the previous year, during the year 2022-23 area under cereals and millets has increased by 0.05% while, area under pulses has decreased marginally by 7.93%.
- Percentage share of area under food crops and non-food crops to the total cropped area in 2022-23 has been recorded 73.05 and 26.95 respectively (Ref. Graph 13).
- Highest percentage share of area under food crops to the total cropped area among states during 2022-23 has been reported in Mizoram with 98.52 and followed by Odisha with 98.01 and Chhattigarh with 97.57 (Ref. Graph 13).
- Highest percentage share of area under noon-food crops to the total cropped area among states during 2022-23 has been reported in Kerala with 64.53 and followed by Gujarat with 57.06 and Rajasthan with 41.65 (Ref. Graph 13).
- Area under foodgrains (cereals and pulses) has decreased by 1.67% from 138629 thousand hectares in 2021-22 to 136309 thousand hectares in 2022-23 (Ref. Table C).
- Area under oilseeds has increased by 3.30% from 32111 thousand hectares in 2021-22 to 33181 thousand hectares in 2022-23 (Ref. Table C).
- Area under fruits and vegetables has decreased by 4.89, while, area under cotton has marginally increased by 5.34% (Ref. Table C).
- Area under sugarcane has increased from 6494 thousand hectares in 2021-22 to 6794 thousand hectares in 2022-23 (increase of 4.63%) (Ref. Table C).
- Percentage share of Wheat to the total cropped area during 1950-51 was 7.59%, which is increased upto 15.95% in 2022-23 (Ref. Graph 14).
- Area of Millets to the total cropped area during 1950-51 was 6.65%, which is decreased upto 0.52% in 2022-23 (Ref. Graph 14).
- Area of Sugarcane to the total cropped area during 1950-51 was 1.33%, which is increased up to 3.10% in 2022-23 (Ref. Graph 14).
- Area of Fruits and Vegetable to the total cropped area during 1950-51 was 1.71%, which is increased upto 1.71 in 2022-23 (Ref. Graph 14).

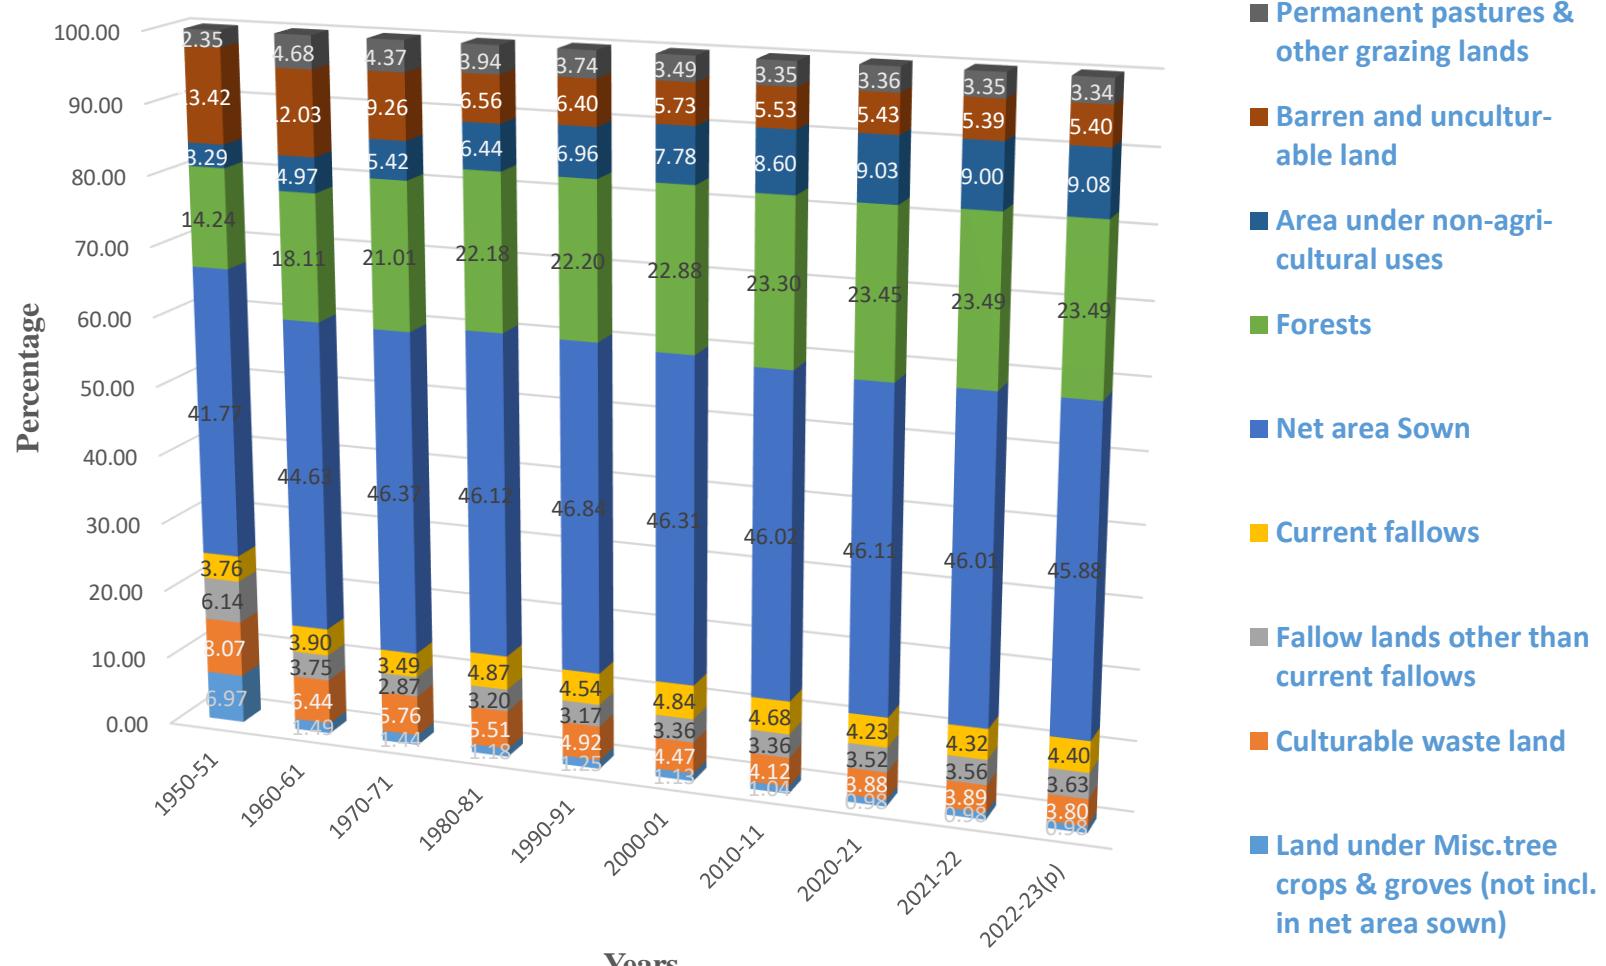

Table D. State-wise Percentage share of Land under Nine Fold Classification to the in the country during the agriculture year 2022-23

Nine Fold Classification of Land	Non Agricultural/Cultivable land (col.1+2+3+4)				Agri. Land/ Cultivable land/ Culturable land/ Arable land (col.5+6+7+8+9)					Total land area reported by states (Area in Th.Ha.) (col. No. 1 to 9)	
	Forests	Not available for cultivation		Other uncultivated land excluding Fallow Land			Fallow Lands				
		Area under non-agricultural uses	Barren & unculturable land	Permanent pastures & other grazing lands	Land under misc. tree crops & groves (not incl. in net area sown)	Cultu - rable waste land	Fallow lands other than current fallows	Current fallows	Net area Sown		
States/ UTs	(1)	(2)	(3)	(4)	(5)	(6)	7	(8)	(9)	(10)	
Andhra Pradesh	22.63	12.83	8.19	1.25	0.95	2.47	5.84	10.71	35.13	12631	
Arunachal Pradesh	92.86	0.34	0.52	0.25	0.44	0.79	0.80	0.46	3.54	7154	
Assam	23.36	17.02	15.07	2.21	2.74	1.88	1.23	1.43	35.05	7829	
Bihar	6.64	18.66	4.61	0.16	2.69	0.47	1.88	10.27	54.63	9360	
Chhattisgarh	47.02	5.26	2.03	6.35	0.02	2.70	1.90	2.20	32.50	14129	
Goa	34.56	26.38	0.00	0.36	0.16	1.33	1.05	1.31	34.85	360

Graph- A Percentage Classification of Land Utilisation in the Country, 2022-23

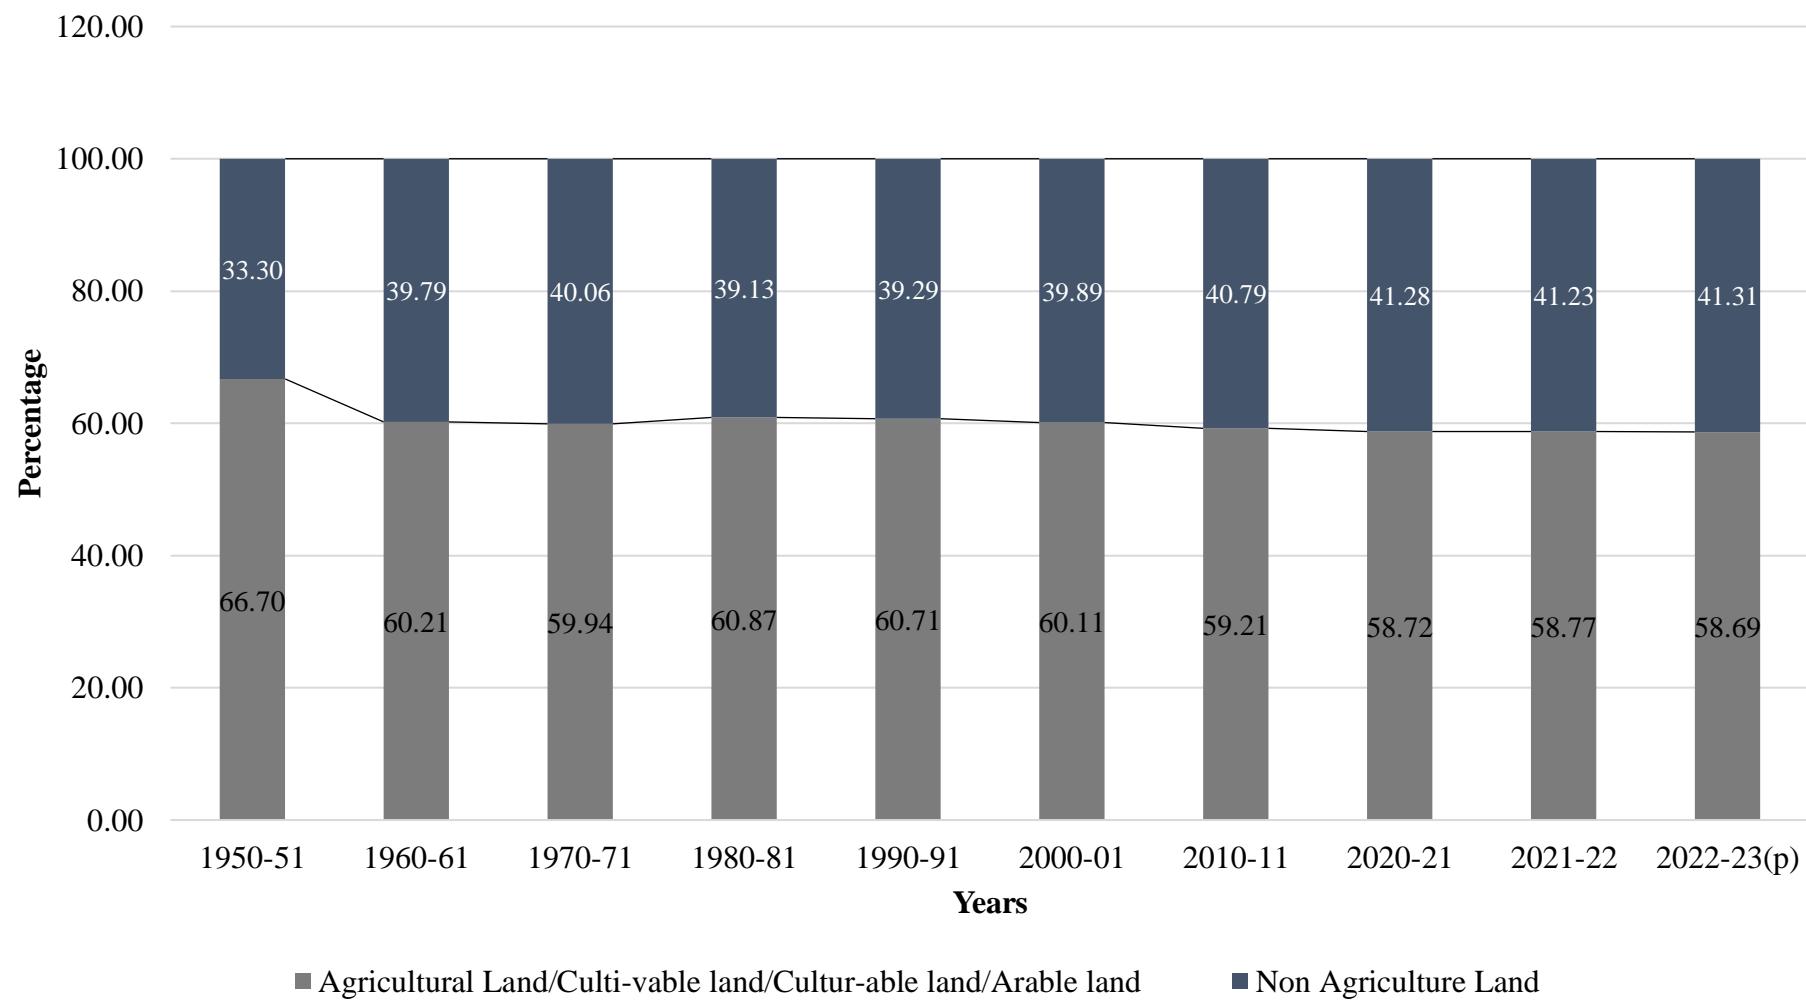

**Graph B: Percentage share of Land under Nine-fold Classification to total Reported Area
(All India) for different years**

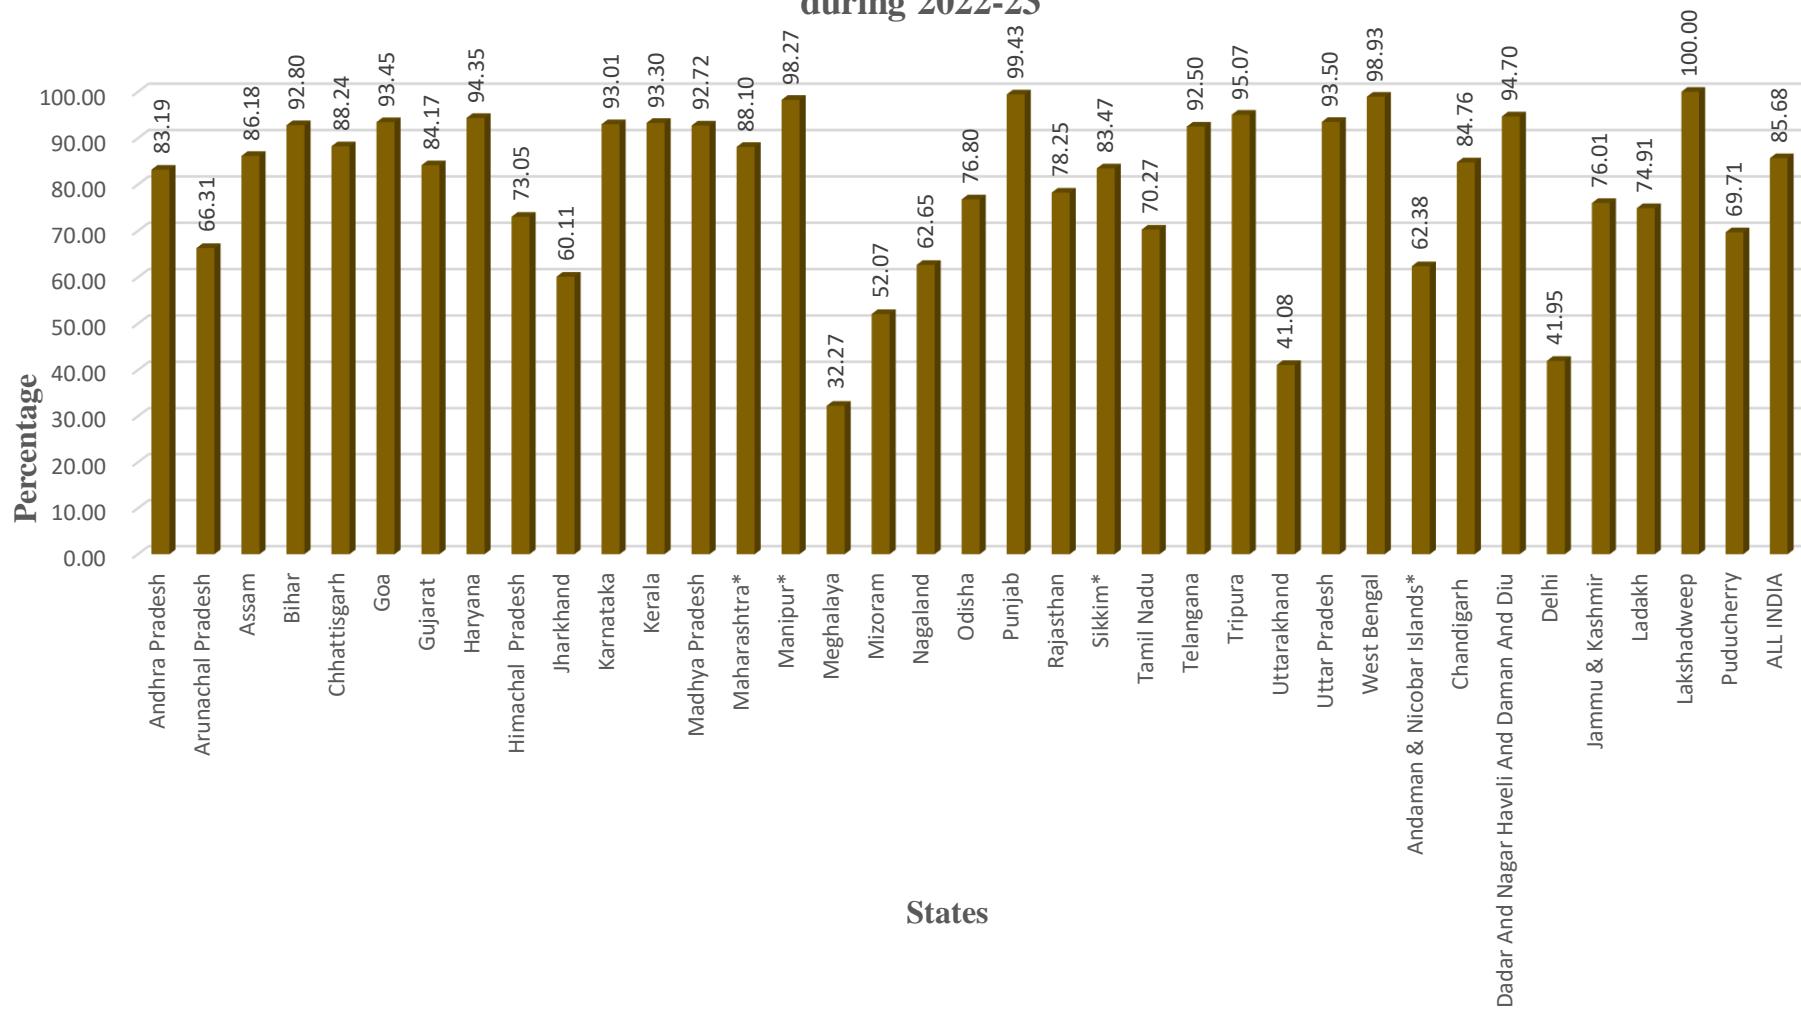

Graph 1: State wise percentage share of Agricultural and Non-Agricultural land to the total reported area - 2022-23

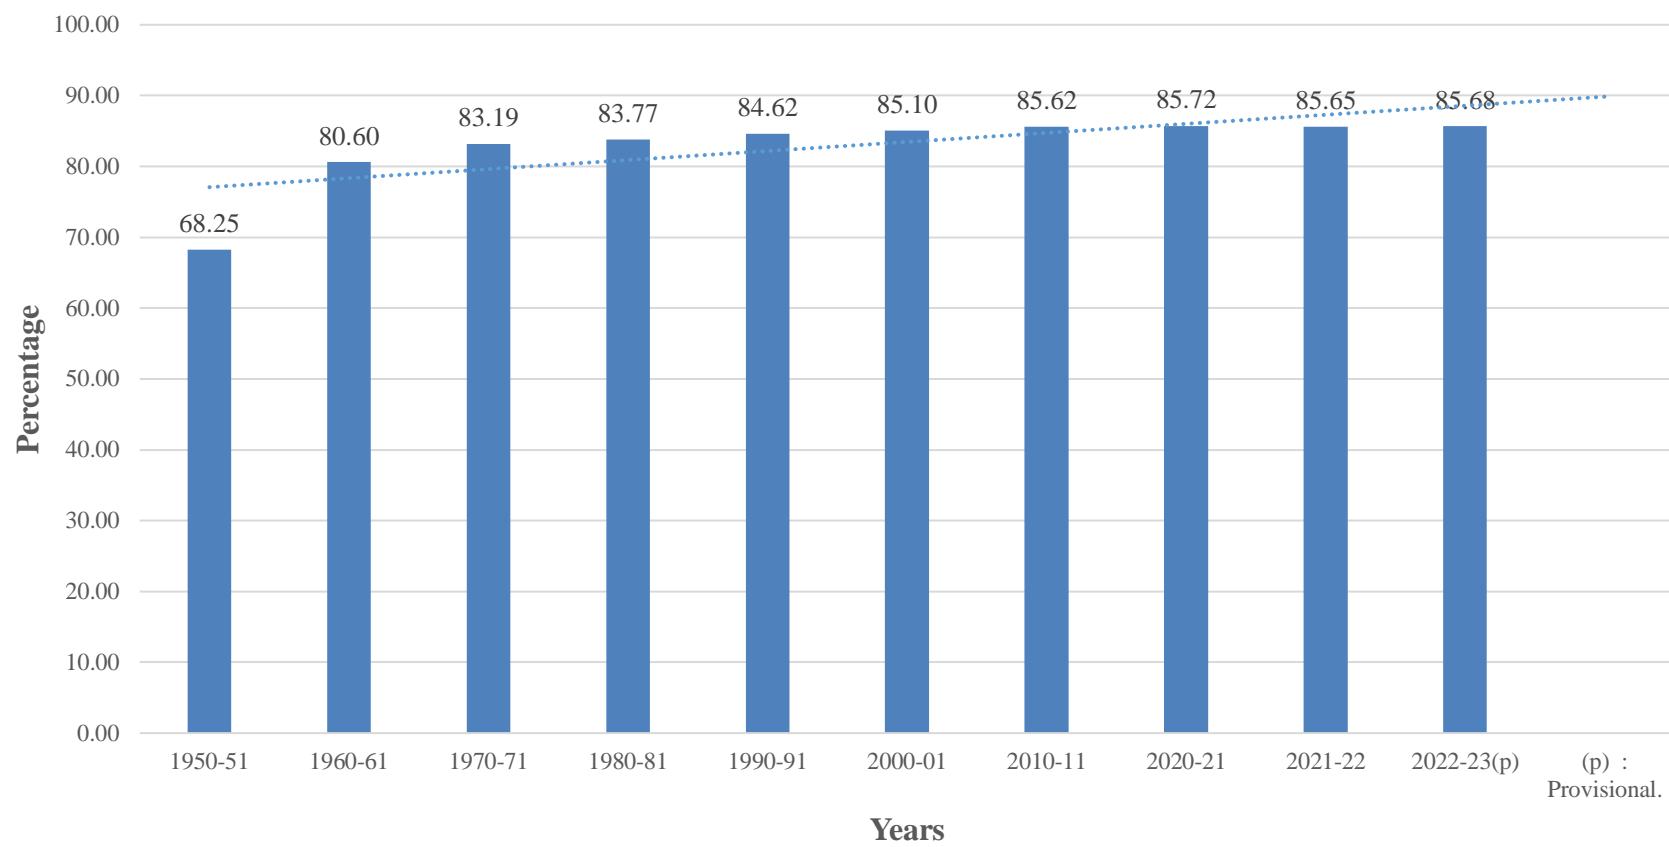

Graph 2: Percentage Share of Agriculture and Non- Agriculture Land to the Total Reported Area for different years

Graph 3: State wise Percentage of Cultivated Land to the total Agricultural/cultivable Land during 2022-23

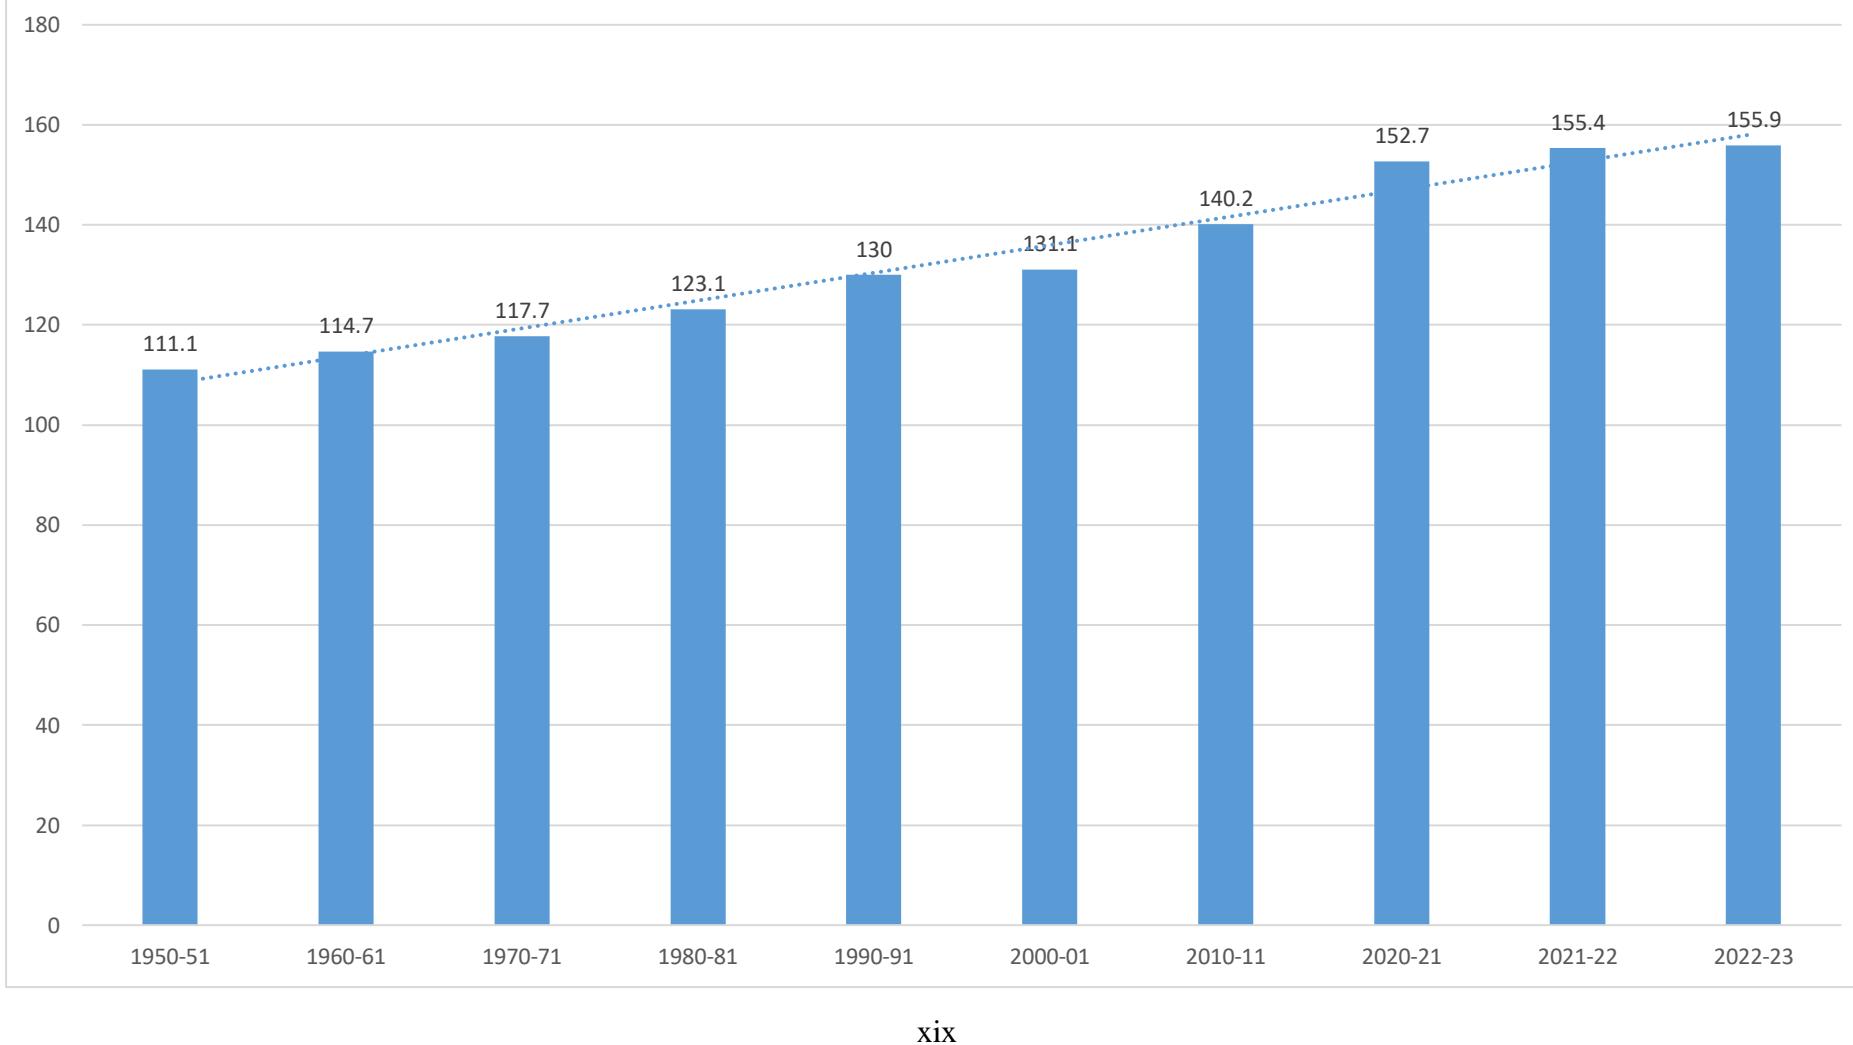

Graph 4: Percentage Share of Area Cultivated from the Total Available Agriculture Land for different years

Graph 5: Percentage Share of Net Area Sown and Area sown more than once to Total Cropped Area for different years

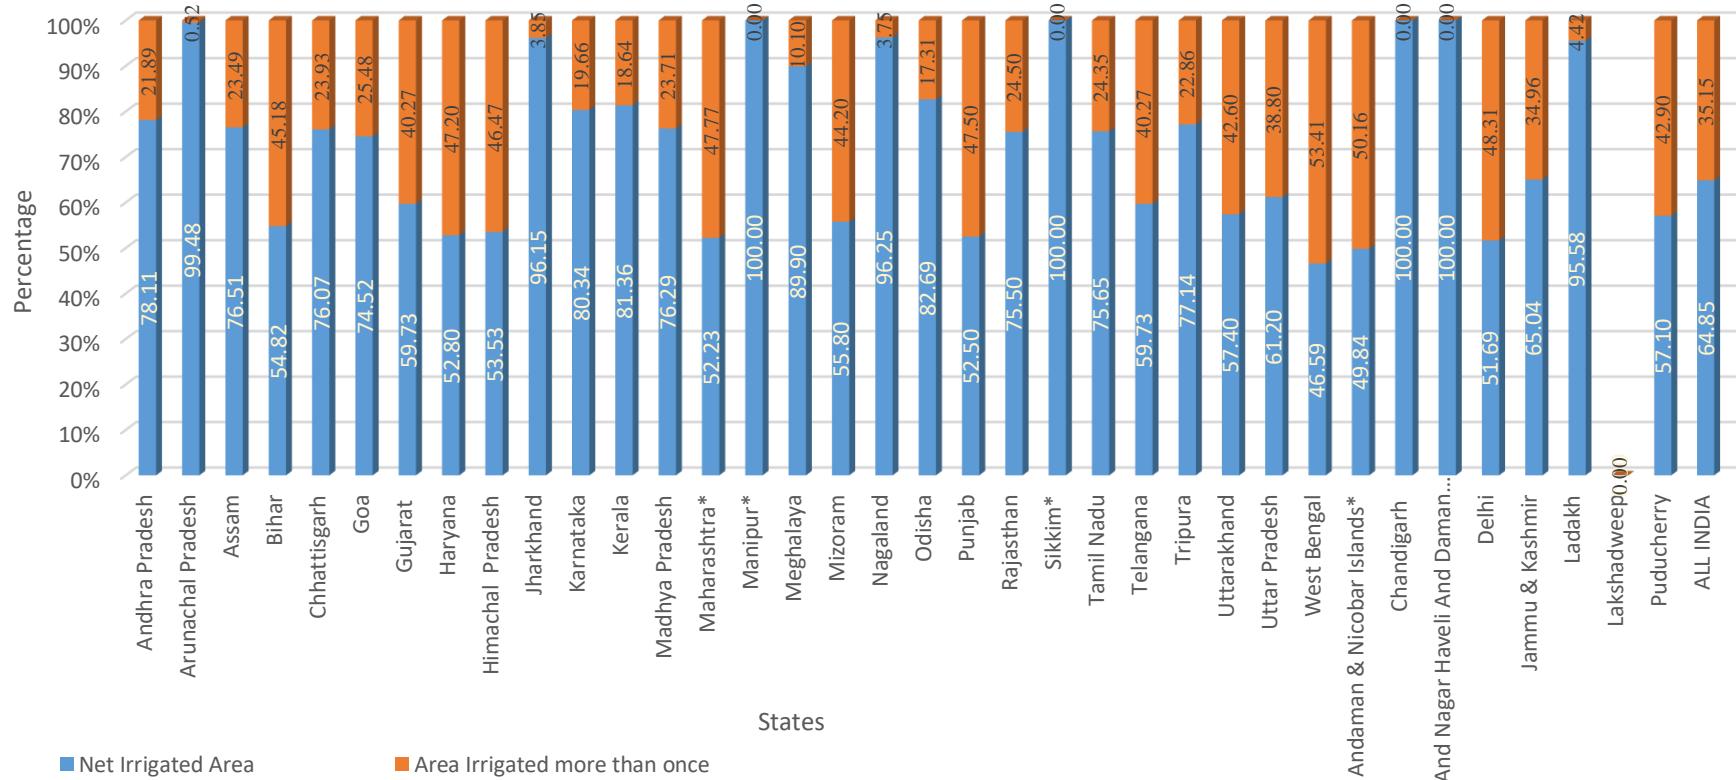

Graph 6: Cropping Intensity (%) - All India

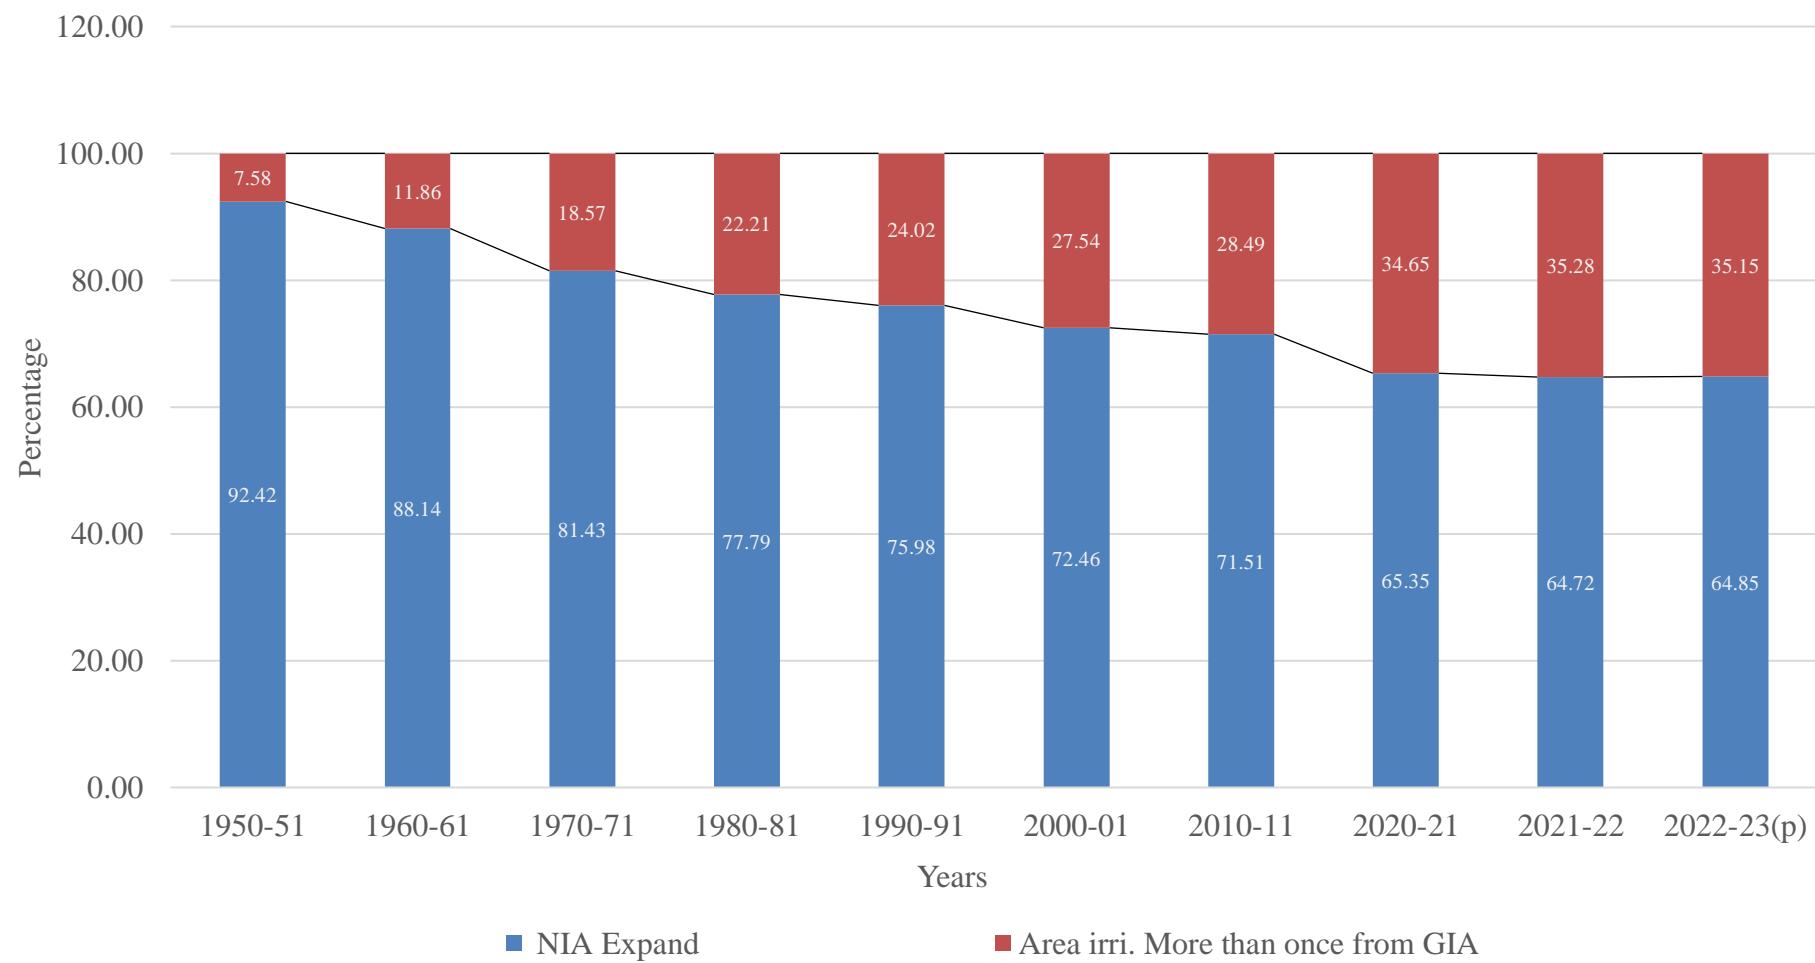

xix

Graph 7: State wise percentage share of net irrigated area and area irrigated more than once from gross Irrigated area -2022-23

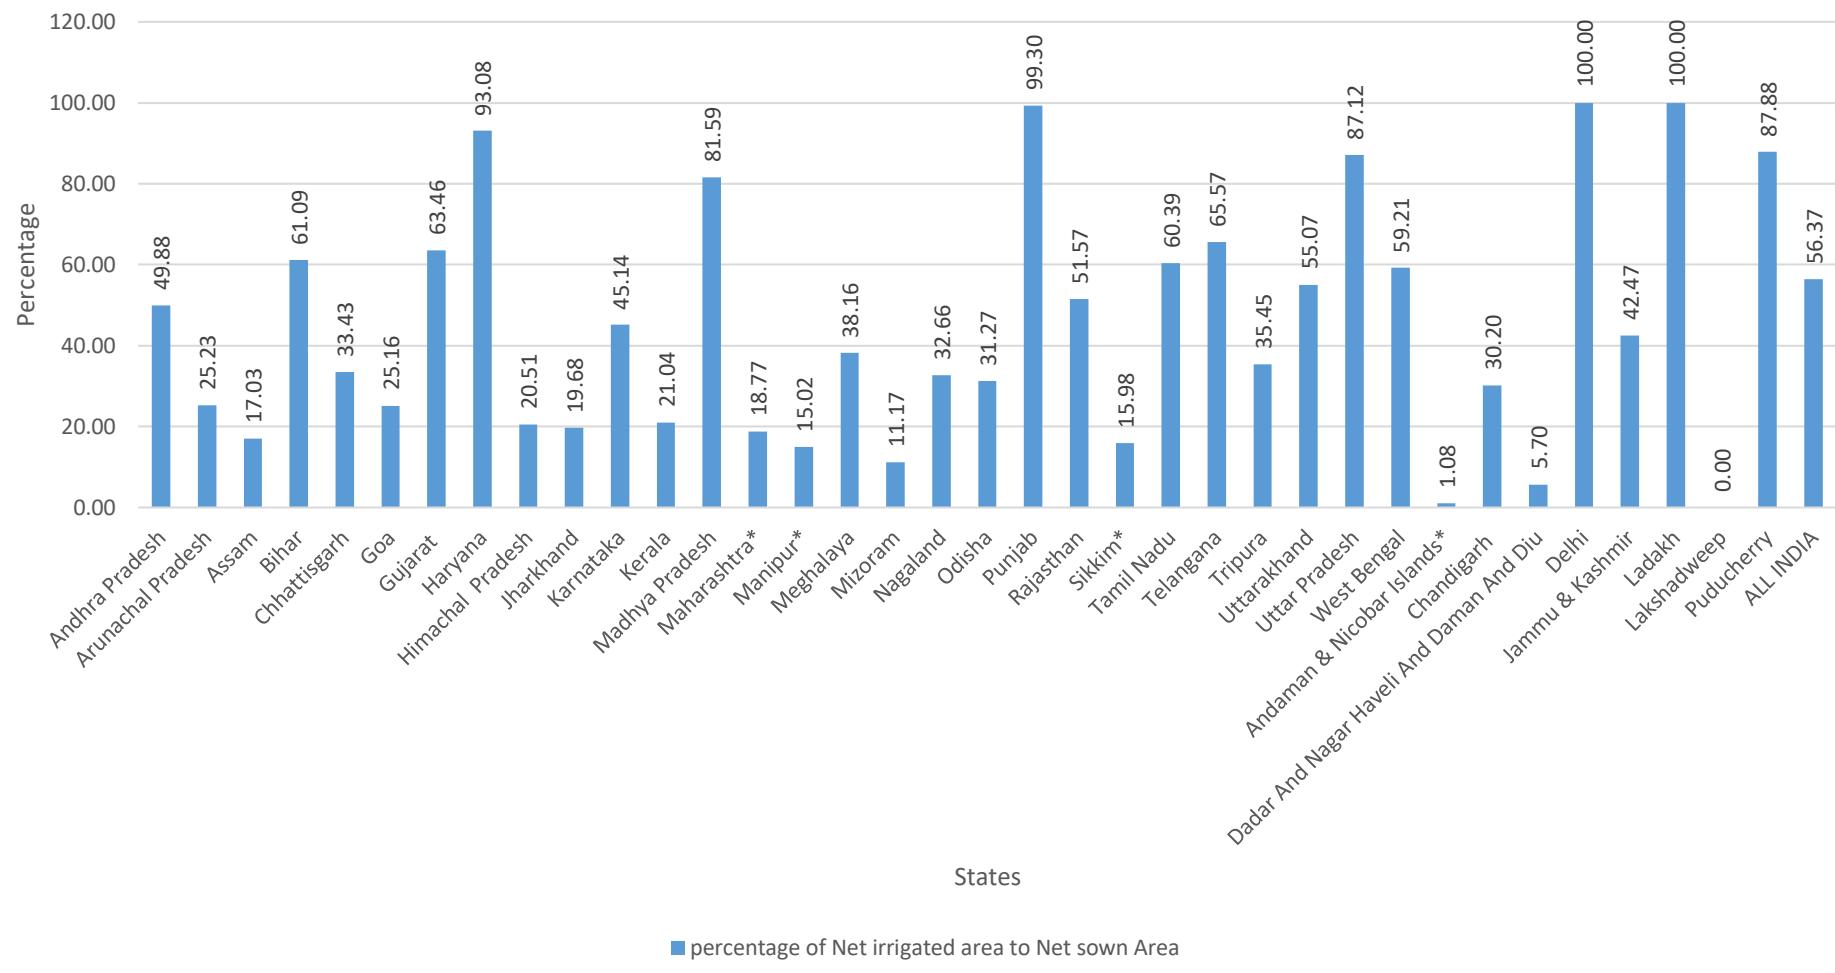

XX

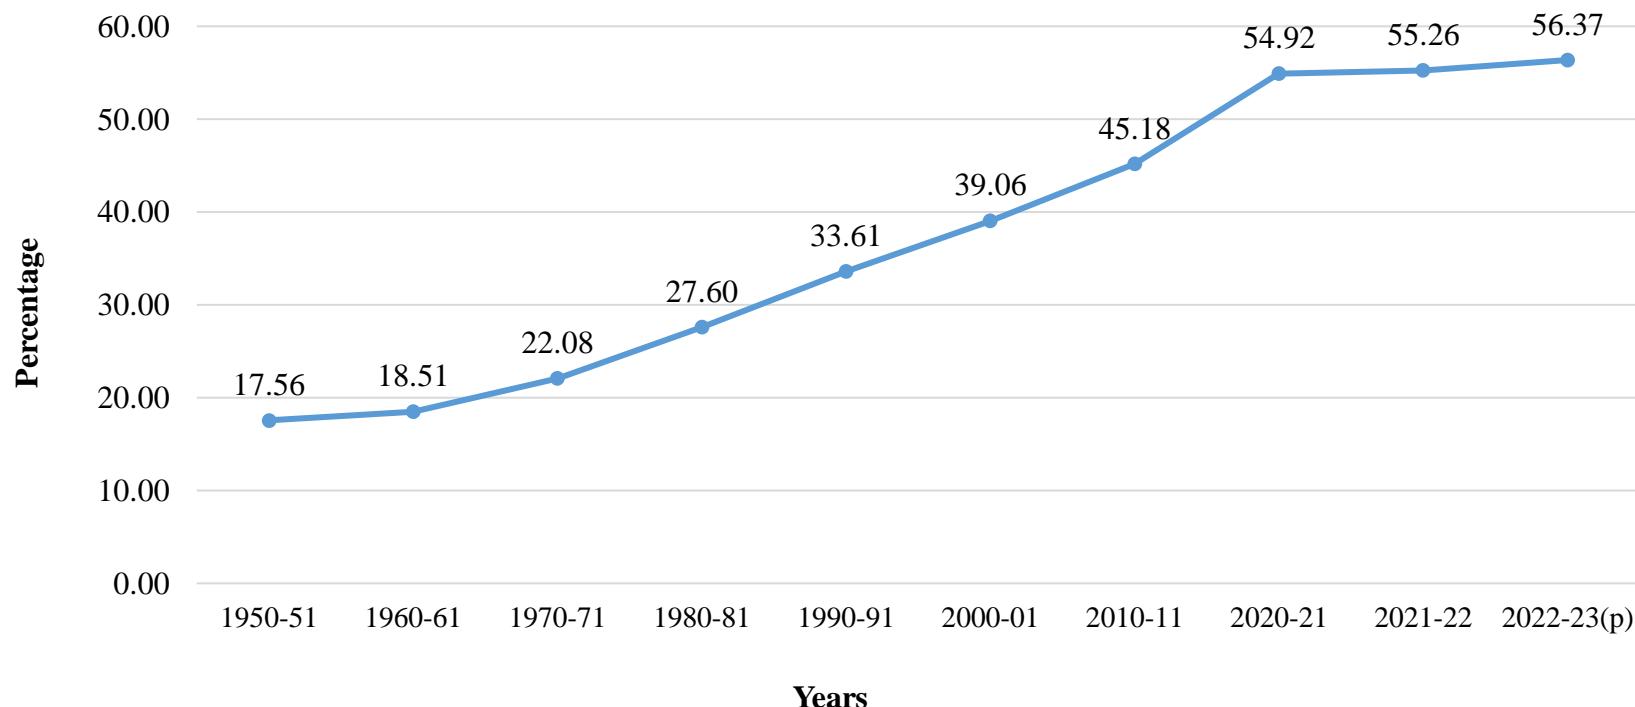

Graph 8: Percentage Share of Net Irrigated Area & Area Irrigated more than once to the Gross Irrigated Area for different years

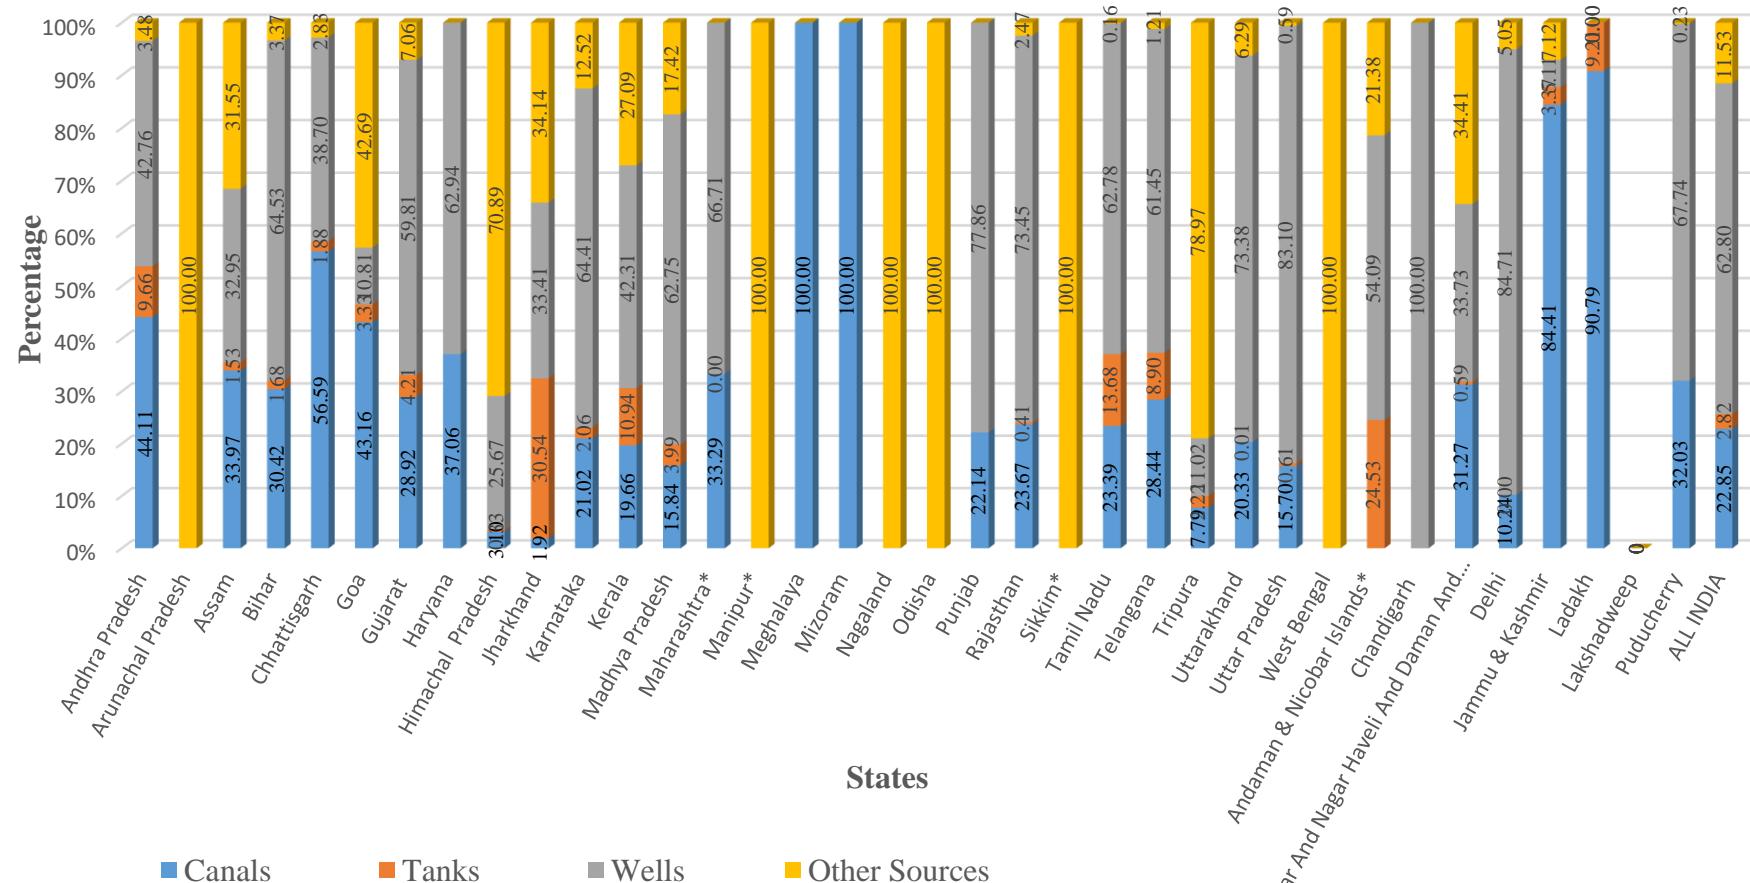

Graph No. 9. State wise percentage share of Net irrigated area to Net sown area -2022-23

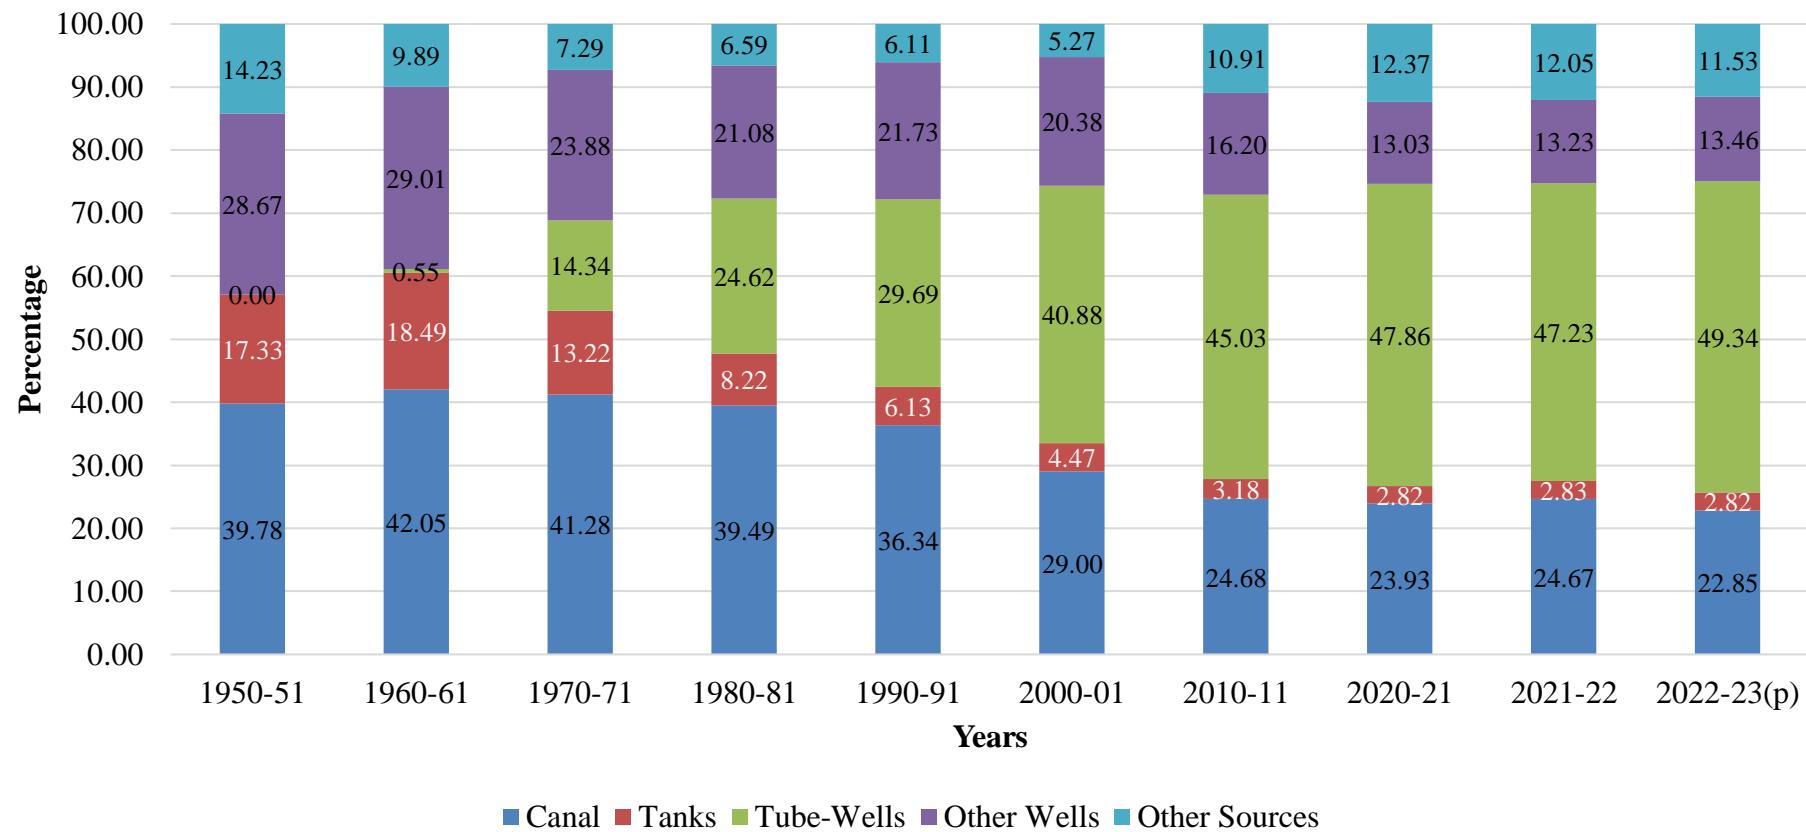

Graph 10: Percentage Share of Net irrigated Area to Net Sown Area for different years

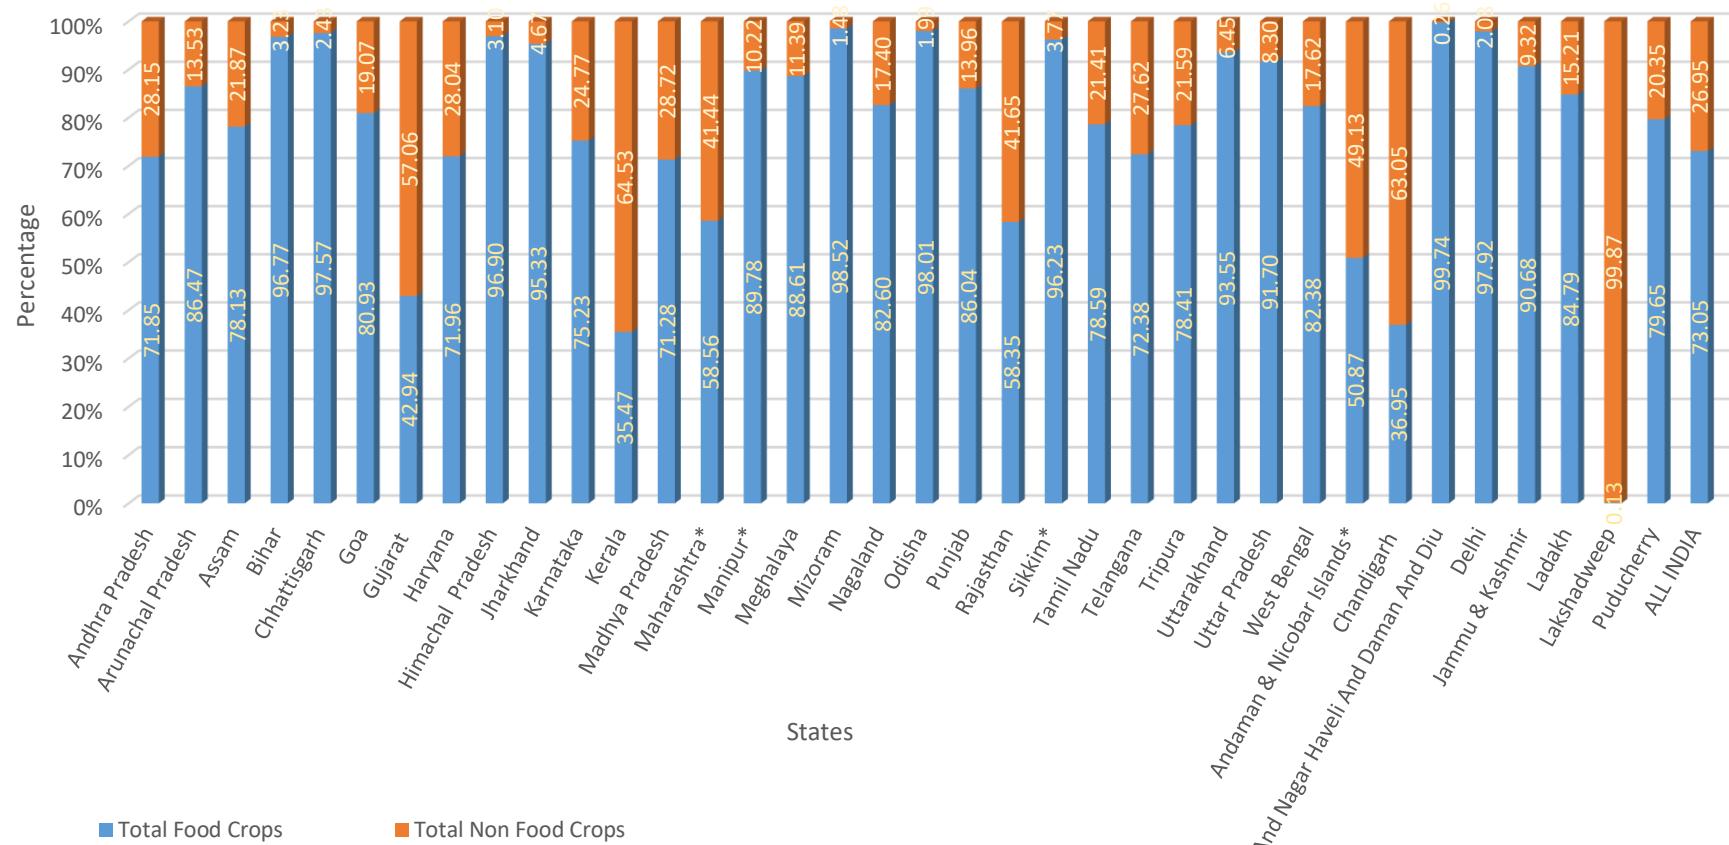

Graph No. 11. State wise Percentage share of Area Irrigated by different sources to the Net Irrigated Area 2022-23

Graph 12: Percentage Share of Area Irrigated by different sources to the Net Irrigated Area for different years

Graph No. 13. State wise percentage share of Area under Food and Non Food Crops to the total Croped Area- 20022-23

Graph 14: Percentage share of Area under different Food and Non Food crops to the total Cropeed Area (All India) for different years

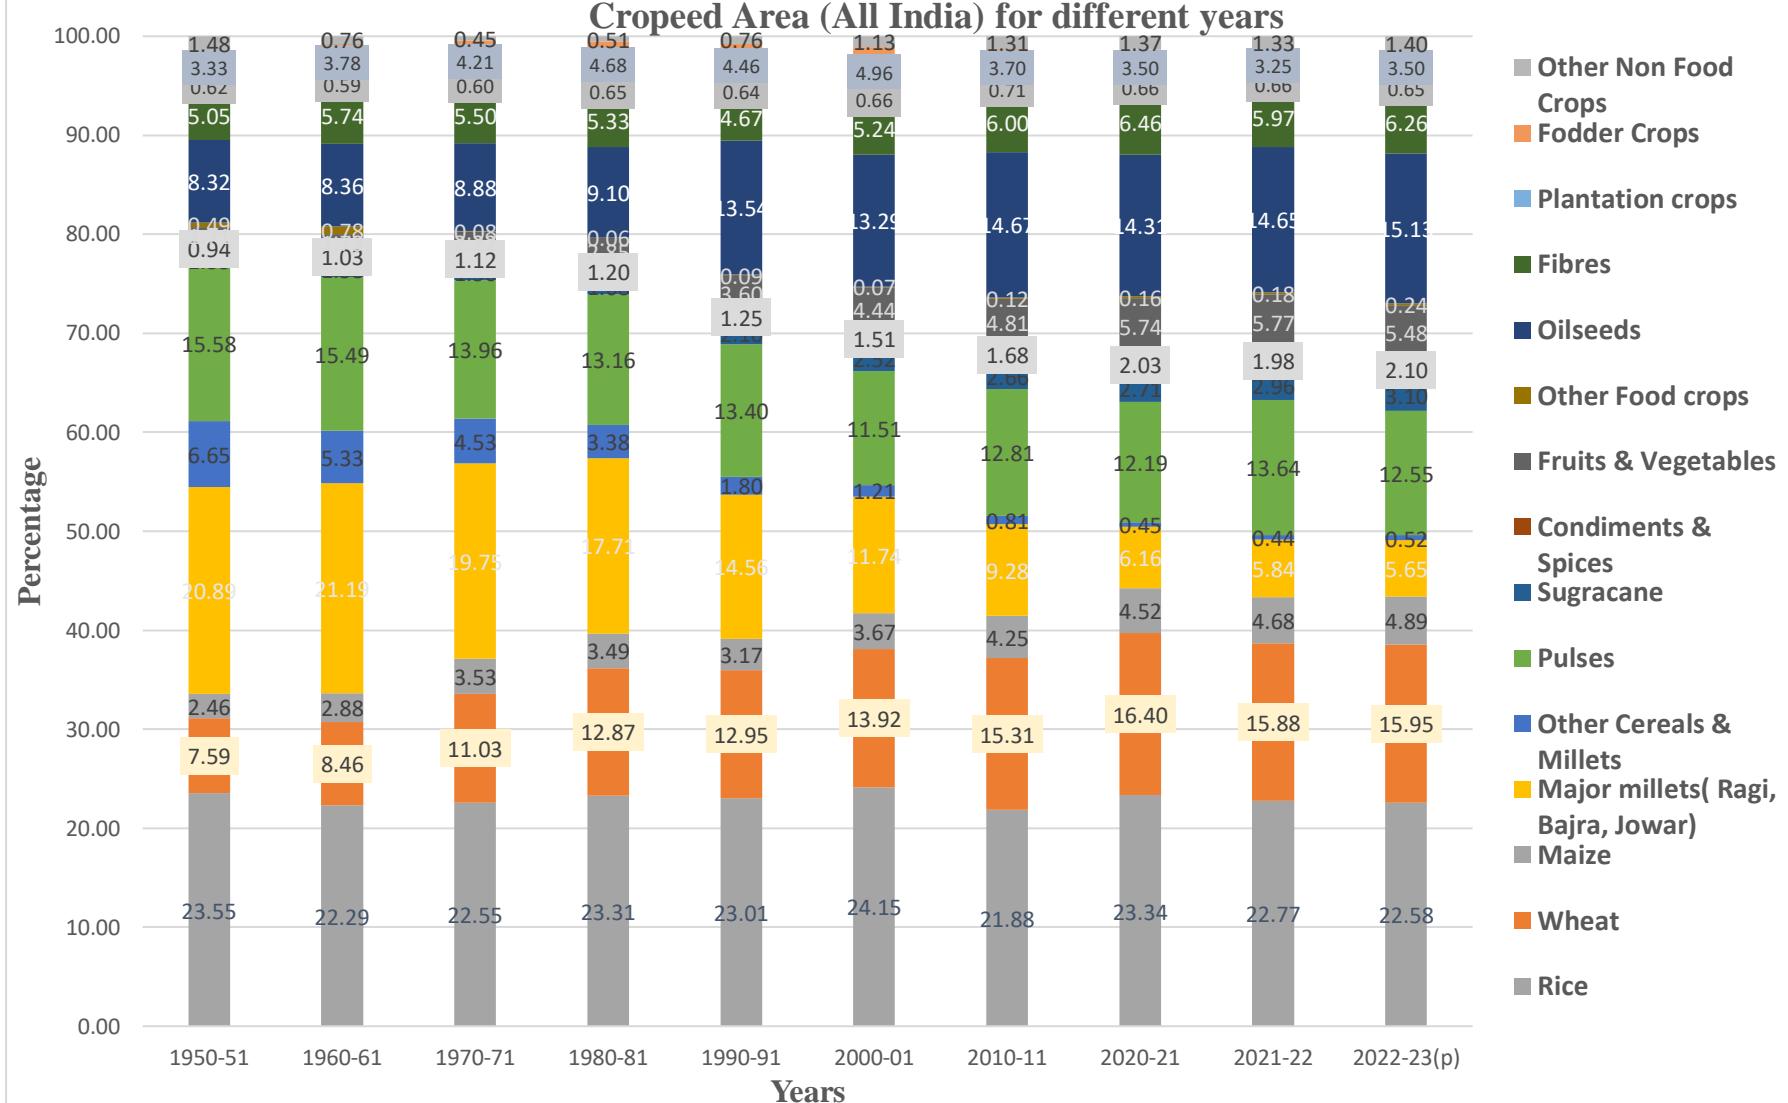

TABLE (i)
LAND USE CLASSIFICATION - ALL INDIA

Year	Geographic al Area	Reporting area for land utilisation statistics (col.4+7+ 11+14+15)	Forests	(Thousand Hectares)						
				Not available for cultivation			Other uncultivated land excluding fallow land			
				Area under non- agri- cultural uses	Barren and uncultur- able land	Total (col.5+6)	Permanent pastures & other grazing lands	Land under Misc.tree crops & groves (not incl. in net area sown)	Culturable waste land	Total (col.8 to 10)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)

: Provisional

: In 2002-03 there is significant decline in Total Cropped Area and Net Area Sown due to decline in net area sown in the States of Andhra Pradesh, Karnataka, Kerala, Madhya Pradesh Maharashtra, Orissa, Rajasthan, Tamil Nadu, West Bengal and Haryana. This was mainly due to deficient rainfall.

: In 2009-10 there is significant decline in Total Cropped Area and Net Area Sown due to decline in net area sown in the States of Andhra Pradesh, Bihar, Jharkhand, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. This was mainly due to deficient rainfall.

\$: UT of Ladakh was bifurcated from the state of Jammu and Kashmir on 31st October, 2019. For Ladakh and Jammu & Kashmir, Area of Shape file was taken from Forest Survey of India, which is subject to change. The combined geographical area for both UTs reported to be 222236 sq km.
